Victor Marine's Australian Agent AMI Completes Installation On *Shannah*

Victor Marine is proud to announce that our Australian agent AMI has completed an installation on the *Shannah* passenger vessel and is undergoing initial sea trials. The following is an excerpt from their press release.

*"The vessel Shannah (Hull 690) was built at Strategic Marine and had its complete electronics package supplied and installed by AMI Marine. The package included products from suppliers Kelvin Hughes, Thrane & Thrane, Simrad, IMCOS, McMurdo, Walker, Hepworth, **Victor Marine Oily Water Separator** and Tecnicomar.*

The project was overseen by the Vietnam branch of AMI, with support from AMI Singapore and the head office in Fremantle, Western Australia.

A second, identical vessel is due for completion shortly."

Victor Marine Ltd are specialists in the design and manufacture of Tank Washing Machines, Gas Freeing Fans, Oily Water Separators and Sewage Treatment Plants.

Leading the field from its UK headquarters, Victor Marine has forged relationships with agents worldwide to provide shipbuilders, operators and owners with the most respected and reliable products in the marine business, including full customer support and unrivalled after-sales service.

The Victor MiniSep range of Oily Water Separators is by far our best-selling product, and now includes the recently designed and approved CS Lite OWS unit, a compact and lightweight version of the original CS range of OWS. Victor Marine also manufactures the VM Series of OWS units, for the more discerning vessel owner. The complete range of Victor MiniSep OWS units are renowned for their efficiency, economy, ease of installation and servicing and importantly, are extremely user-friendly, making the installation and use of these units trouble-free.
